

Exhaust Hose Reel. Spring- or Motordriven

The **ecovent exhaust hose reel**. Hold on with this unit one or two working places of the wall or ceiling. Whether truck-exhaust or car-exhaust, our hose reels are suitable for diameters between 76mm until 150mm and hose lengths until 15m.

We have developed this product together with our customers, to enable a fair actual market requirement. Because our customers should have long pleasure with this high quality, German made reel.

In order to take care of the hose, the hose reel is provided with an integral, free adjustable hose stop. The hose is **not loaded** at all while rolling against the end stroke. We are the only one who have this solution.

The motorized exhaust hose reel is provided with a powerful 0,23 kW electric motor. Both of the end switches can be gradeless adjusted. An overload safety switch guarantees a long lasting motor life.

The highlights on one view:

- Stable, powder coated body
- One drum-diameter for all hoses = flexible assembly possible
- Universally mounting possibilities at wall or ceiling
- Mounting kit for attachment at beams or supports
- Integrated hose guide with diagonal retainer
- Flow axle 150 mm (Special solution with 200mm possible)
- Extensive control accessories
- Quick clamping clutch for tubing or fan direct attachment

Technical data (without hose):

Type FS/MS	Length [mm]	Mass [kg]	Height [mm]	Width [mm]	Capacity [m] at nominal Size				
					75	100	125	150	200
680	850	57,0	760	630	12,20	9,90	8,40	7,30	5,70
880	1250	62,0	760	630	16,40	13,40	11,50	10,10	8,20
1080	1450	67,0	760	630	20,50	16,90	14,60	13,00	10,70

The capacity of the hose reel refers to the pure drum add. 0,50m for the connection, and depending upon customer's request of a free hanging auxiliary length.
