

Exhaust fan type VB in industrial quality

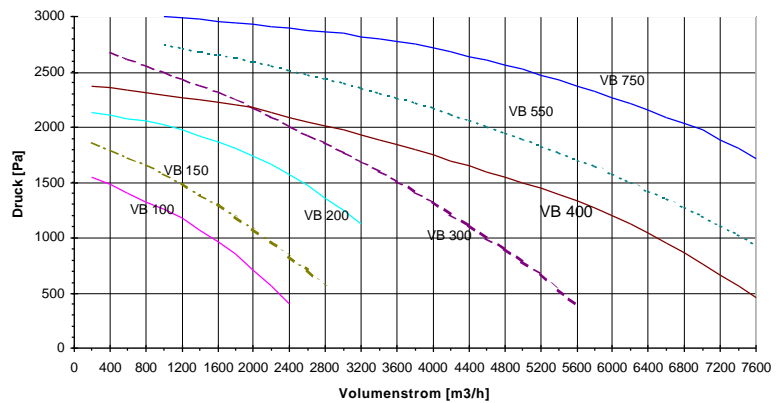

Radial Fan VB 100 to VB 1000

Radial fans of the serie VB are most suitable for exhaust extraction systems. Through ist self cleaning impeller with backward bended blades it can reach a high efficiency of up to 75% even after years.

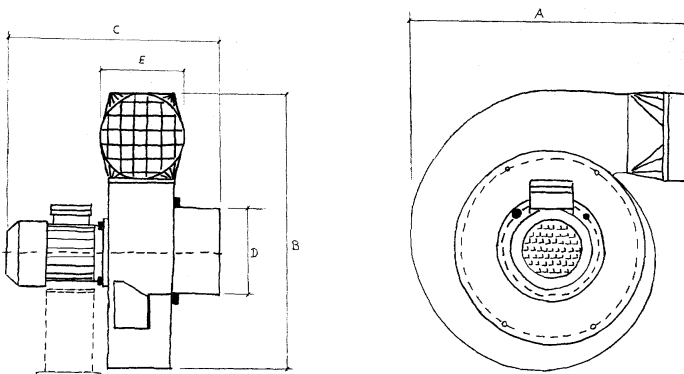

The construction is made of powder coated steel and the impeller is made of welded aluminium. A long life industry three-phase motor moves the directly flanged impeller.
